

DEPARTMENT OF SEED TECHNOLOGY  
SHMM, GOVERNMENT DEGREE COLLEGE ANANTNAG

Best practice activity (2024)

**Title of activity: Experiential learning/hands on training on  
production and  
marketing of hybrid maize sweet corn.**

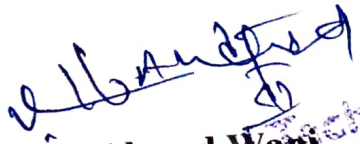

As a part of experiential learning/hands on training expertise, which the students can use and help their family at home to produce the good agricultural crops to enhance family income, the department of seed technology has established and produced the hybrid sweet corn crop in the field experiment station with the objective to inculcate thorough theoretical as well as practical skill based knowledge to the students perusing seed technology as minor as well as skill courses. The students were given all the practical and scientific knowledge from the date of sowing till the harvest, how to produce healthy and best crop. The activities include preparation of field, line sowing, application of fertilizers on scientific basis, pest & disease management, irrigation and harvesting of mature cobs. Further more these students were also given scientific methods, how to produce hybrids in maize also. After the harvest all the produce of these sweet corn cobs were put on the sale to college fraternity in which students also participated with the objective to inculcate them the concepts of smart marketing skills.

After the harvest all the produce of these sweet corn cobs were put on the sale to college fraternity in which students also participated with the objective to inculcate them the concepts of smart marketing skills.
