**Nature and
Current Environmental Issues**

Theme for Debate:

**Earth and
its Conservation**

About the event 2022

Environment day is celebrated worldwide on 5th June since 1973 to raise the awareness for the protection of the environment. Each year the theme of the day marks the importance of environment. This year UNEP has decided the theme for environment day as “Only One Earth”, with the focus on “Living Sustainably in Harmony with Nature”. There is a circularity in this year’s World Environment Day as 50 years ago the theme of the Stockholm Conference was exactly the same, “Only One Earth”. The message is as important today as it was then. The slogan does emphasize that planet Earth is still the only liveable planet we have and to push for transformative actions to reset the balance between people and the natural world to create a better future for all. With over 150 countries participating, this UN international day engages governments, businesses, civil society, schools, cities and communities, raising awareness and celebrating environmental action.

“There is no better time to come together for the planet than now”(UNEP)
